Semantic Quality Evaluation (Gold Standard Matrix)

This tab tests the **actual quality and meaning** of the open-source models' outputs by mathematically comparing them against a "Golden Answer". We use a powerful **Cloudflare Model** (like Llama 3.3 70B) as the ultimate Judge to generate the perfect reference answer, and then we use semantic embeddings (Cosine Similarity) to see which open-source model matches it closest!

@cf/meta/llama-3.3-70b-instruct-fp8-fast (Gold Standard)

The discussion revolves around the digital economy and education in India, with a focus on the government's efforts to increase digital payment transactions and improve digital infrastructure in education. The data shows a significant increase in digital payment transactions, from 220 crore in 2013-2014 to 3134 crore in FY 2018-2019. The government has taken steps to create awareness and strengthen the security system for digital payments, as mentioned in Annexure-I.

In the context of education, the government has introduced several digital initiatives to improve access to education, particularly in rural and underserved areas. The National Education Policy (NEP) 2020 emphasizes the importance of technology integration in education, and initiatives such as PM eVidya and Digital Infrastructure for Knowledge Sharing (DIKSHA) have been launched to provide multi-mode access to education. PM eVidya includes 200 DTH TV channels and 400 radio channels to provide supplementary education in various Indian languages for classes 1-12.

The government has acknowledged the digital infrastructure gaps affecting the implementation of NEP 2020, including poor internet connectivity and lack of access to digital devices in rural, tribal, and economically weaker areas. To bridge these gaps, the government has initiated comprehensive initiatives like PM eVidya, which aims to provide multi-mode access to education across the country. The government has also collaborated with states and union territories to utilize, monitor, and evaluate the effectiveness of these initiatives, with a focus on providing education in mother tongue/local/regional languages.
