Semantic Quality Evaluation (Gold Standard Matrix)

This tab tests the **actual quality and meaning** of the open-source models' outputs by mathematically comparing them against a "Golden Answer". We use a powerful **Cloudflare Model** (like Llama 3.3 70B) as the ultimate Judge to generate the perfect reference answer, and then we use semantic embeddings (Cosine Similarity) to see which open-source model matches it closest!

@cf/meta/llama-3.3-70b-instruct-fp8-fast (Gold Standard)

There is no discussion regarding the topic in the provided parliamentary data. The data appears to be a list of government departments and ministries, repeated multiple times, with no mention of any specific topic or issue being discussed.

The list includes various departments such as Communication and Information Technology, Department of Atomic Energy, Department of Space, External Affairs, Housing and Urban Poverty Alleviation, Overseas Indian Affairs, Panchayat Raj, Personnel, Public Grievances and Pensions, Planning, and Shipping, Road Transport and Highways. However, there is no context or information provided about what is being discussed or debated regarding these departments.

The only unrelated text that appears at the end of the data is "Crime in India, National Crime Records Bureau", but it is not clear how this is related to the rest of the data, and there is no further information provided about this topic.
